Wandsworth, London

SUMMARY

I am a passionate & creative junior software developer with a can-do attitude, always positive and smiling that loves to build things.

After undergoing an intensive full-time software development course, I am now ready to start my career in the tech industry.

PROFESSIONAL EXPERIENCE

Boolean Full-Stack Developer Course

Boolean Careers UK 04/2022 - 10/2022 London (remote)

A full-time 6 months full-stack developer course. I've learned how to turn user requirements into quality software and how to change user requests into features. This included a 4-week team development project working with the rest of my class on an existing codebase. This lets us practise Kanban and Agile with stand-ups and team-retrospectives as well as best practice around branching, merge conflicts, and pull requests.

- Experience of HTML, CSS and JavaScript
- Experience with React
- Experience with writing unit tests in Jasmine
- Experience with responsive and adaptive design
- Excelled in team dev project with 5 stars feedback from the team

Various Hospitality roles including Assistant Restaurant Manager

Fenwick 06/2018 - 12/2021 London, UK

- Worked my way up from Catering Assistant to Assistant Manager
- Managed a team of 20 staff, including rotas and shift responsibilities
- Budget and invoice responsibility for suppliers up to £50k a year
- Ensured the restaurant's successful delivery of ~1,500 covers per week during peak season

EDUCATION

Licenza terza media (equivalent of GCS Es)

Italian School 2005 Turin, IT

LANGUAGES

English Advanced ●●●●● Italian Native ●●●●●

QUALIFICATIONS

SOFTWARE DEVELOPER CERTIFICATE

SKILLS

Tech Stack

Javascript React Node.js HTML
CSS Express.js SQL PostgreSQL
Prisma Material UI Tailwind

Operating Systems

MacOS Windows

PROJECTS

Cohort Manager 2.0

A Software developed with my peers during the Boolean Boot camp.

A web-based learning management system where teachers and admins can manage courses and users while allowing interactions among students and teachers by implementing a post area.

[Live App](#) (credentials: email - teacher@teacher.com pass - 123)

Play_Nation

A simple serverless application, made with mock data using a JSON file, to improve my skills using React, JavaScript, CSS and Tailwind.

A Website that allows the User, through a list of games, to choose the game he is interested in and have more information about it, with the possibility to be redirected to the game website.

[Live App](#)

RolePlay

A text-based 'social media like' RPG developed during my final weeks at Boolean.

It allows the User to create an account and with the same email have multiple characters. Each character can participate in one Game, posting stories based on that specific game and play with other characters.
